A cloud services cheat sheet for AWS, Azure and Google Cloud

—TREVOR JONES, SITE EDITOR

AWS, MICROSOFT AND GOOGLE each offer well over 100 cloud services. It's hard enough keeping tabs on what one cloud offers, so good luck trying to get a handle on the products from the three major providers.

Even trying to compare what's available in each cloud can quickly get convoluted, since naming conventions vary by vendor and service. For example, you can be forgiven for not knowing AWS Fargate, Microsoft Azure Container Instances and Google Cloud Run all essentially serve the same purpose.

So, if you ever feel at a loss for what's what, hopefully this cloud services cheat sheet will help. Consider it a guide for

cloud directories—a quick reference sheet for what each vendor calls the same service.

However, you can also use this as a starting point. You'll need to do your homework to get a more nuanced understanding of what distinguishes the offerings from one another. Follow some of the links throughout this piece and take that next step in dissecting these offerings.

That's because not all services are equal—each has its own set of features and capabilities, and the functionality might vary widely across platforms. And just because a provider doesn't have a designated service in one of these categories, that doesn't mean it's impossible to achieve the same objective. For example, Google Cloud doesn't offer an explicit disaster recovery service, but it's certainly capable of supporting DR.

Here is our cloud services cheat sheet of the services available on AWS, Google Cloud and Azure. The list is broken down by category to help you start your cross-cloud analysis. ■

Editor's note: Cloud services are constantly evolving. All information in this cheat sheet is up to date as of publication. We will periodically update the list to reflect the ongoing changes across all three platforms.

	AWS	AZURE	GOOGLE CLOUD
AI containers	AWS Deep Learning Containers	GPU support on AKS	Deep Learning Containers
AI machine images	AWS Deep Learning AMIs	Data Science Virtual Machines	Deep Learning VM Image
Chat bots builder	Amazon Lex	Azure Bot Service, QnA Maker	Dialogflow
Data labeling	Amazon SageMaker Ground Truth	Azure Machine Learning data labeling	Cloud Data Labeling
Document extraction, image content analysis	Amazon Textract	Azure Form Recognizer, Ink Recognizer, Computer Vision, Custom Vision	Vision API
Image and video recognition, indexing	Amazon Rekognition	Azure Face, Video Indexer	Video AI
Inference accelerator	Amazon Elastic Inference	GPUs on AKS	Cloud TPU, Edge TPU
Language recognition, sentiment analysis	Amazon Comprehend	Language Understanding, Text Analytics	Natural Language
Language translation	Amazon Translate	Speech Translation, Translator	Translation
Machine learning hardware	AWS Inferentia, AWS Trainium (preview*)	FPGA	Cloud TPU
Managed machine learning platform	Amazon SageMaker	Azure Machine Learning	Cloud AutoML
Online fraud detection	Amazon Fraud Detector	N/A	reCAPTCHA Enterprise
Prediction review and moderation	Amazon Augmented AI, Amazon SageMaker Clarify	Azure Content Moderator	N/A
Recommendation integration	Amazon Personalize	Personalizer	Recommendations AI (preview)
Speech recognition	Amazon Transcribe	Speaker Recognition, Speech to Text	Cloud Speech-to-Text API
